14. Please describe any specific aspects of the course and/or teaching practices that your instructor used that particularly helped you to engage with the material, learn the material, and/or develop your own critical perspectives on the material.

I found the topics used in the examples to be really interesting.

In class the instructor would show us the codes live on stata or R .

One thing that helped me was the practice pseudocode.

The amount of practice

The in class activities were extremely helpful when we were learning new code.

The organization of Canvas and the sent out emails/announcements/plans for the week

The teacher made an intimidating subject very easy to approach and had the perfect middle ground between expecting us to know basic computer use but not have extensive knowledge on the subject. I was previously intimidated by R and coding and now I know how to use it with confidence.

The weekly plans made it easy to know what is expected for the week. The homeworks and in class examples were really good for learning material as well.

15. Please describe any specific aspects of the course and/or teaching practices that your instructor used that were less helpful for your learning. Optionally you may offer constructive suggestions that might improve their effectiveness.

I think that like with everything, experience will help the professor grow, but for a new professor, she has been a great professor.

The face paced explanations

There is not enough feedback on results of assignments.

16. Please describe any specific aspects of the course and/or teaching practices that your instructor used that created or interfered with a welcoming learning environment that valued and supported students from all backgrounds and identities.

I found it so caring and welcoming how she would bring treats for the class.

Professor Chakravorty's kind and intellectual demeanor created

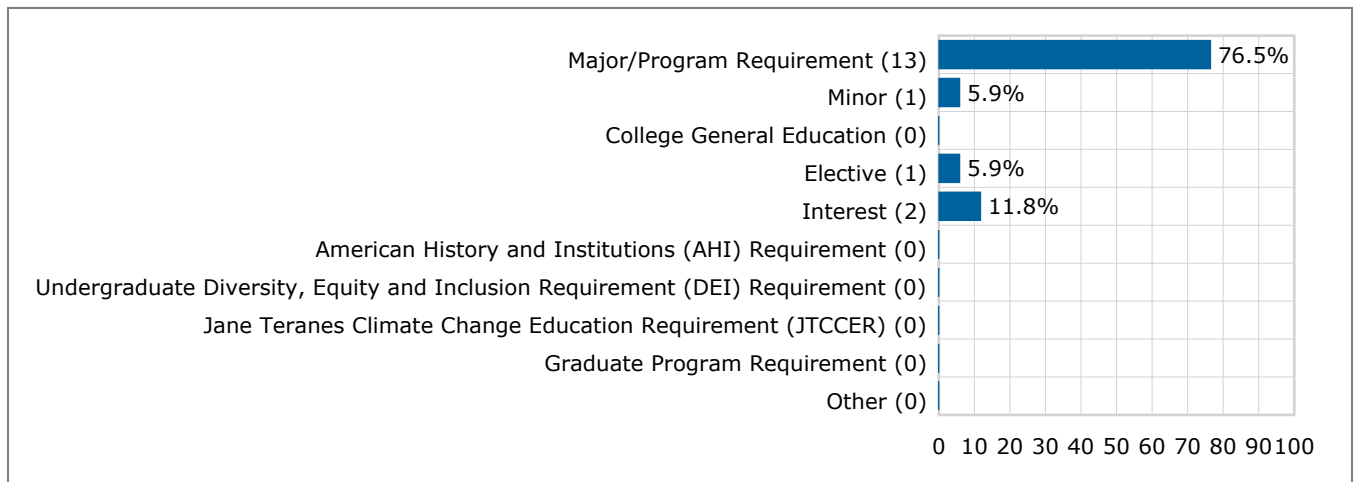

She made all students feel welcomed and provided a very welcoming environment to participate.

She welcomed all questions during class.
